

CHRIS BADAHDAH

Senior Software Engineer

contact@djblue.dev
github.com/djblue
Tempe, AZ

SUMMARY

Senior software engineer with eleven years of experience. Highly skilled in full stack development with Clojure, ClojureScript and AWS.

EDUCATION

Computer Science BS

Arizona State University

2012 - 2015

SKILLS

Languages

Clojure, ClojureScript,
JavaScript, Java, HTML,
CSS, Bash

Frameworks

React.js, Node.js,
Express.js, GraphQL,
Reagent, Ring

Databases

MongoDB, SQLite, Postgres

Tools

Git, Webpack, NPM, Yarn,
Leiningen, Jenkins

AWS

SQS/SNS, DynamoDB, ECR,
Lambda, Kubernetes

EXPERIENCE

Senior Software Engineer at Snap eHealth

Remote

April 2023 - Current

- Implemented normalized data extraction for direct EHR integrations with AthenaHealth and Veradigm.
- Lead on product feature to link EHR patients with CSV records to aid in managing vulnerable subset of patient population.
- Optimized MongoDB queries via profiling to better utilize indexes and improve page load times.
- Introduced snapshot testing for our backend business processes to help catch regressions while minimizing maintenance burden.

Senior Software Engineer at Guaranteed Rate

Remote

February 2020 - April 2023

- Implemented a dynamic flow based digital mortgage application utilizing Clojure, ClojureScript and a variety of AWS services.
- Leveraged Jenkins and Kubernetes to implement isolated pull request deployments to aid in quality assurance testing.
- Mentored engineers on Clojure, ClojureScript and functional programming.

UI Architect at Connexa, LLC

Phoenix, AZ

January 2019 - February 2020

- Modernized large web app from Backbone/Marionette to React/GraphQL to improve performance and maintainability.
- Improved UI stability by implementing end-to-end testing with headless Chrome.
- Mentored engineers on JavaScript and browser based UI development.

PROJECTS

- djblue.github.io/portal: A data inspection / visualization tool for Clojure / ClojureScript.
- [jank-lang/jank](https://github.com/jank-lang/jank): A native Clojure dialect with C++ interop. Contributed mainly to runtime data models and standard library.
